DERIVED FROM: Anhydrous Ammonia, Phosphoric Acid, Potassium Hydroxide, Urea, Ammonium Nitrate, Copper Diammonium EDTA, Ferric Ammonium EDTA, Manganese Dipotassium EDTA, and Zinc Tetraammine Acetate.

# KEEP OUT OF REACH OF CHILDREN PRECAUTION

Do not ingest. Avoid contact with skin, eyes or clothing. Avoid breathing dust, vapor or mist.

FIRST AID
In all cases, call a poison control center or doctor for further treatment advice

IF SWALLOWED, call a poison control center or doctor immediately. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to by a poison control center or doctor. Do not give anything to an unconscious person. IF ON SKIN, take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. IF INHALED, move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration. IF IN EYES, hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing.

For chemical spills, leaks, fire or exposure, call CHEMTREC: (800) 424-9300.

## STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage, disposal or cleaning of equipment.

Store in a safe manner. TILL-IT® RZ-7® should be stored and transported in poly or stainless steel tanks. Agitate thoroughly before transferring to another tank. Dispose of unused product and empty containers in accordance with federal, state and local regulations.

#### **GENERAL INFORMATION**

TILL-IT RZ-7 should be used as part of a comprehensive Total Nutrition System® for optimizing plant growth, development, yield and quality.

#### **DIRECTIONS FOR USE**

SOIL APPLICATIONS: TILL-IT RZ-7 can be applied to crops by banding in or near the seed row surface dribble, strip-till, bed placement, irrigation or by other methods. Consult your local Wilbur-Ellis representative for specific recommendations. When TILL-IT RZ-7 is applied in the seed row (directly on the seed) certain crop and rate restrictions apply. Until local experience is gained, refer to Seed Row Placement table for crop and suggested maximum rate instructions. The use of available "splitter" devices that apply fertilizer to the sides of the V-slot is encouraged. Do not apply directly on the seed in saline, alkali, salty or coarse textured soils. Seed row placement is not recommended for crops not listed in the table.

FOLIAR APPLICATIONS (Including Vegetable and Field Crops, Deciduous Fruit and Nut Trees, Grapes, Olives, and Citrus): Apply 1-3 gallons per acre in a minimum of 5 gallons of water per acre. Repeat applications may be beneficial. Use of surfactant may enhance leaf coverage and increase nutrient absorption. Do not apply when the crop is excessively stressed for moisture or during periods of high temperatures. Use the lowest possible volume for thorough coverage with a small droplet size. Optimum foliar application conditions for most crops generally occur during early morning or late

MIXING INSTRUCTIONS: TILL-IT RZ-7 disperses well in water with a minimum of agitation. For best results, mix as follows

- 1. Partially fill tank with water or fertilizer and start agitation.
- Add TILL-IT RZ-7 to circulating tank mix.
- Add other pesticides or nutrients if compatible
- Fill tank and agitate thoroughly.

#### **COMPATIBILITY**

TILL-IT RZ-7 is not compatible with products such as salts of heavy metals like magnesium, copper, manganese, zinc, and iron compounds. Do not mix with calcium-based fertilizers. Always jar test new combinations for compatibility prior to field mixing.

Information regarding the contents and levels of metals in this product is available on the Internet at http://www.aapfco.org/metals.htm
