SHAKE WELL BEFORE USING

Top Plot™ Seed Starter Liquid Fertilizer 15-0-1 is a plant nutrient formula that's designed for new and existing wildlife food plots of all types. Wildlife food plots with Top Plot Seed Starter Fertilizer respond quicker with seed establishment and development. That means you'll see game sooner as plots become productive earlier in the season.

Because plants can absorb Top Plot Seed Starter through both the soil and foliage, the formula can be used at the time of seeding as well as to rejuvenate and maintain established plots in both the spring and fall.

Getting Started:

Top Plot Seed Starter best accelerates seed establishment when applied before or at seeding. A second application at the same rate is recommended in 14 days. Apply over the top of newly established plots to encourage continued growth. Application in spring and fall will help maintain and green up established plots.

Where to Use:

For use with all types of wildlife food plots and wildlife management areas.

Coverage:

Top Plot Seed Starter used for plot establishment can cover up to 10,000 sq. ft.

Amount to Use:

Wildlife Food Plot Application Rates		
Amount of Concentrate to Add to Spray Tank	32 fl. oz.	2.5 Gallons
Amount of Water to Add to Concentrate	96 fl. oz. (3 quarts)	7.5 Gallons
Total Spray Solution to Apply (In Gallons)	1 Gallon (For Spot Applications)	10 Gallons (For 12 Volt ATV & Pull Behind Sprayers)
Coverage Area	1,000 sq. ft.	10,000 sq. ft.

Application:

- Determine area to be treated:
 - Multiply area's length by width and deduct any areas where application is not wanted. This is the total square footage of the area.
 - Calculate amount of Top Plot Seed Starter and water needed to cover area.
- Mix Top Plot Seed Starter in sprayer:
 - Fill tank to ½ the needed volume of water.
 - Add appropriate amount of Top Plot Seed Starter while mixing thoroughly.
- Slowly mix in the remaining amount of water to tank.
- Spray uniformly to area.

For Best Results:

Irrigation or rainfall within 24 hours after planting and application enhances the performance of Top Plot Seed Starter. Apply just prior to rainfall or irrigate to 0.25-0.5 inches of water.
